

Information Technology

Our IT practice handles a broad spectrum of contentious and non-contentious IT matters at national and international level. Our lawyers are not only IT law experts but also have a sound commercial and technical understanding of the industry and are uniquely placed to advise companies in this fast-changing sector:

The team works alongside other specialists within the firm in order to provide a seamless service across a range of sectors and practice areas. In addition to our Belgian presence, we work with networks of trusted foreign correspondents for cross-border work.

OUR CLIENTS

Our clients are active in a wide range of sectors, including the banking and finance, healthcare, automotive, marketing, media and entertainment, and telecom.

OUR APPROACH

We believe that it is vital to understand the business environments and industry sectors in which our clients operate. We have therefore developed **specific sector expertise** within our team. This enables us to offer clear, practical advice from a commercial perspective as well as a legal perspective to help our clients realise their business goals.

Our lawyers also take a **practical and commercial approach to disputes**, viewing litigation as a means to an end and never as an end in itself. We place importance on the early settlement of disputes through actively encouraging cost-effective alternative dispute resolution whenever possible.

OUR ADVISORY WORK

IT Contracts

We advise on, negotiate and draft IT contracts mainly for IT users, assisting them in their dealings with professional IT suppliers, and provide specialist support on M&A and corporate transactions involving complex IT issues or technology companies.

Privacy and data protection

Our services cover registration with data protection authorities, devising procedures for the transfer of data between countries both inside and outside the EEA; implementing robust data security policies; responding to subject access requests; implementing compliant direct marketing, CRM, data-mining, social networking initiatives and resolving data protection issues arising from corporate and outsourcing projects in general.

IT Audits

We review the validity of existing IT contracts, the adequacy of standard terms and conditions, the legality of employment contracts, as well as the compliance of intranets and websites with data protection rules and electronic commerce regulations.

E-commerce

Our work covers everything from e-business start-ups, commercial and financial agreements and advice on tax, regulatory and competition issues to user generated content, liability of ISPs, copyright, branding, advertising, banking and payment systems, betting and gaming, consumer protection, electronic signature or e-invoicing.

OUR CONTENTIOUS SERVICES

We represent clients before the Belgian courts in various proceedings, such as interim injunctions, proceedings with internet service providers for the removal of illegal activities or information, general litigation with respect to contractual or liability issues.

GLOBAL PARTNERS

Liedekerke is the exclusive member firm for Belgium of a number of international networks. One of these networks is Lex Mundi, world's leading network of independent law firms with in-depth experience in 100+ countries worldwide.
